KEVIN BERTOLINI

Pontal, SP - Brazil • +55 (16) 99321-6799 • kevinbertolini1203@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Software Developer and Data Analyst background with a solid technical foundation in Systems Analysis and Development. Combines 3 harvest seasons of hands-on experience in industrial quality control, laboratory analytics, and process automation within the energy/agribusiness sector. Proficient in Python, SQL, TypeScript, React, and Power BI. Skilled at leveraging data analytical insights, backend architectures, and machine learning models to streamline operational efficiency and data-driven decision-making.

EDUCATION

B.S. in Systems Analysis and Development — Expected 2029
UniCesumar (Distance Learning)

Associate Degree in Chemical Technology — Completed
SENAI Ettore Zanini — Sertãozinho, SP

PROFESSIONAL EXPERIENCE

Quality Control & Laboratory Analyst — Apr 2026 – Present
Usina Bela Vista (Bazam Group) — *Pontal, SP*

- Execute physicochemical quality control for sugar and ethanol production (Brix, Pol, purity, ART, moisture, ICUMSA color).
- Monitor real-time quality parameters across production stages, maintaining structured data logs and reporting anomalies.
- Author technical inspection reports ensuring 100% data traceability and compliance with strict industrial standards.

Quality Control & Laboratory Analyst — May 2025 – Dec 2025
Usina Bela Vista (Bazam Group) — *Pontal, SP*

- Managed full laboratory sampling routines and physicochemical analyses to validate batch quality standards.
- Consolidated and structured raw analytical data to track key performance indicators (KPIs) for industrial processing.

Laboratory Analyst — Apr 2024 – Dec 2024
Usina Itajobi (Carolo Unit) — *Itajobi, SP*

- Collected and analyzed industrial samples to optimize chemical process parameters and ensure quality assurance.

Operations Assistant (Vinhaça Operations) — May 2023 – Dec 2023
Usina Bela Vista — *Pontal, SP*

- Provided operational support and logistics management for industrial byproduct treatment and distribution.

KEY ENGINEERING PROJECTS

CanaScan — GIS & AI Planting Gap Analytics — Python | OpenCV | U-Net | PySide6

- Built a desktop solution utilizing **U-Net deep learning models** and computer vision to analyze drone orthomosaics, detect sugarcane planting gaps, and generate automated executive reports (CSV/HTML).

Bella & Chic — Multi-Tenant SaaS Platform — React | TypeScript | Node.js | Firebase

- Architected a full-stack SaaS application deployed on Linux VPS for salon management, client CRM, automated scheduling, and financial analytics.

Bertolini ERP — Offline-First Desktop ERP/POS — Python | FastAPI | PySide6 | SQLite

- Engineered a commercial ERP and Point of Sale (POS) system featuring asynchronous ORM, inventory tracking, and real-time transaction reports.

TECHNICAL SKILLS & COMPETENCIES

Software Engineering & Web
Python, TypeScript, JavaScript, React, Node.js, FastAPI, REST APIs, Git/GitHub

Data Engineering & Analytics
SQL (PostgreSQL, MySQL, SQLite), SQLAlchemy, Power BI, Advanced Excel, OpenCV, U-Net
